REED MEDICAL FOOTWEAR CATALOGUE

Ladies

Mens

Kids

Sports
Since its launch in 1995, the REECO brand has been the U.K. market leader in both technical ability and innovation, introducing new Lowline and Nature last designs, together with new exclusive materials such as the now industry standard Diabetic Lining.

Our latest innovation, ‘Hidden Depths’ is a new concept in Orthopaedic Footwear. High street styling that combines both function and flair by the use of a moulded polyurethane sole unit that offers much increased durability over EVA, so reducing repair costs.

Our recently acquired ‘Shoemaster’ software, together with our in-house C.N.C. last carving facility and NESTOR leather cutting, allows our designers to manufacture custom lasts and patterns from standard foot drafts, or from scans of your patient’s feet, utilising digital camera or laser scan technology. (Should you wish to discuss fixed price modular and bespoke footwear please contact us).

Our customer services staff are always pleased to help should you have any particular requirements. We have a designated Technical Support Manager who can liaise with manufacturing on your behalf and help with advice and suggestions on how to obtain the best results using Reeco footwear.

Softee leather. Leather tongue. Microflex apron.

FULLFLEX DIABETIC
Softee leather. Leather tongue. Microflex front.
THE SPECIALIST

For those practitioners seeking less flexible footwear for the diabetic patient, we introduce "The Specialist". Manufactured in "Army Calf" and with a moulded carbon fibre through stiffener, this footwear offers a more rigid environment for the treatment of the diabetic foot. Xsair lining, thru wedge soles and rocker with a sach heel complete the standard specification. Available in both regular and nature last designs, and in all width and depth fittings.

*Items with this symbol are non returnable.*
DIABETIC NATURE

THE NATURE LAST
Developed to benefit those patients whose needs demand reduced medial forefoot pressure, this additional, unique last design, presents further options in the treatment of the at risk diabetic foot. Due to the specific toe shape of the lasts we advise that plain vamp or punched front styles are chosen to maintain the cosmetic value of the footwear.

REDUCED MEDIAL FOREFOOT PRESSURE
SPECIFICALLY DESIGNED TO FOLLOW THE NATURAL CONTOURS OF THE FOOT
How many times have you wished to be able to show your clients a range of footwear that they would be pleased to wear?

A range that offers ‘high street’ styling, more fashionable toe shapes, yet retains the tried and tested REECO sizing formula as a fundamental requirement. Well now you can with the ‘Hidden Depths’ range of footwear.

The cleverly designed range of the ‘Hidden Depths’ polyurethane moulded sole unit disguises 8 mm of the upper depth which enhances the cosmetic appearance of our footwear, particularly when extra depth models are requested, yet still allows us to offer an increase in bunion pocket width of up to 6mm. (Most depth additions remain unaffected).

It has been demonstrated that the abrasion resistance of a Polyurethane unit can be several times higher than that of an E.V.A. unit without compromising grip, stability or comfort, so reducing repair costs.

Should you require any more than the 6mm bottom width addition limit, or complex sole and heel adaptations, we will be able to offer the ‘Hidden Depths’ styles with our new free flowing ‘Trend’ E.V.A. sole units which have been modelled to lend themselves to this younger and more stylish range.

As the trend continues for footwear to become less formal, we have attempted to reflect this change in fashion by the use of our Nova last, combined with a more casual upper design and our innovative “Hidden Depth” P.U. unit. All shoes are available in lace or velcro® fastening. The Sandal is velcro® fastening only.

Available in Narrow, Standard, Wide, Deep, Wide and Deep and Lowline lasts in Mens sizes 5 to 12 and Ladies sizes 1 to 8. Please use the current REECO accommodation chart to assess for the correct size and fitting of footwear.

DIABETIC SPECIFICATION is available in the Hidden Depth range with Diabetic lining as standard. A full range of alternative linings are available as in Plush, Leather and Performance.

Simple modular adaptions are achievable, as well as the application of Sockets, T Straps, Rocker Soles, Wedges and Total Contact Insoles.
JANE
A classic plain fronted 3-eyelet shoe that lends itself beautifully to our Nova last shape.

SUSAN
A classic ever popular ‘bowling’ shoe.

SUSAN
(Shown here with optional Velcro® fastening).

HIDDEN DEPTHS

ANNE
A 3-eyelet apron fronted ladies shoe with lightly padded, quilt-stitched vamp. Non-invasive apron stitching with a seamless vamp lining.

EMILY
An extended opening ladies shoe, enabling ease of access for any rigid forefoot conditions.
FAYE
An extended opening “bowling” style ladies shoe with decorative stitch detail to the quarters and vamp.

GINNI
A 3-eyelet plain fronted ladies shoe made from fine soft leathers.
REECO

REHABILITATION RANGE
VANGUARD
The latest innovation in rehabilitation footwear

Manufactured with silver lining offering Anti-Microbial advantages that include the elimination of MRSA within 1 hour of contact, as well as Anti-Odour, Thermo Dynamic, Anti-Static and Anti-Fungal properties.

VANGUARD SHOE

ADVANTAGES

- Easy entry
- Adjustable both back and front to accommodate variable oedema
- Innovative design allows for adjustable ankle circumference
- Washable at 30 degrees
- Silver lining
- Flexible, lightweight, hard wearing soles
- Shock absorbent insole

Available in sizes 1 to 12 in Standard, Wide, Deep and Wide and Deep models, this footwear is perfect for the "at risk" foot. Please refer to the REECO accommodation chart for correct sizing.

Ideal for patients suffering from ulceration, neuropathy, oedema or post operative swelling and bandages.

Offered in both boot and shoe options with velcro adjustable heel and foreparts for maximum comfort and completed with a shock absorbent, slip resistant P.U. sole and heel unit.

VANGUARD BOOT

ANTIMICROBIAL PERFORMANCE

eliminates 99.9% of 800 known bacteria, including MRSA, within one hour of contact.

ANTI ODOUR

Silver linings allow for immediate binding with ammonia and denatured proteins resulting in instant odour reduction.

THERMO DYNAMIC

Silver is the most thermally conductive element. works quickly to evenly distribute and transfer heat.

ANTI STATIC

contains pure silver, which will conduct electricity very efficiently - instantly dissipating triboelectric charges resulting in static free, comfortable products.

ANTI FUNGAL

Laboratory tested to be effective against fungus, including T.Mengatrophytes, the fungus that causes Athletes Foot.
GAITOR ARCH SUPPORTS
For Shock Absorption, Arch Support & Comfort

Gaitor 3/4 Length Arch Supports are designed to provide superior shock absorption, arch support and comfort to your feet. Incorporating a successfully patented waffle design which effectively duplicates nature’s own shock absorbing system in your feet, the combination of modern materials provide a lightweight, yet highly effective shock absorber. Revolutionary new technologies offer an ultra thin carbon fibre arch support which will provide long-lasting relief and comfort. This technologically advanced carbon material may be adjusted when necessary, offering a degree of customisation.

Gaitor 3/4 Length Arch Supports provide immediate and maximum relief for common painful conditions such as Plantar Fasciitis and Heel Spurs.

In addition these insoles contain a combination of materials which keep your feet cooler and drier. Bacteria and fungal growth inhibitors have been added to increase sanitation and reduce unwanted odours.
